Outlook

The company targets Strategy 3.0 - tripling generation capacity to 30 GW and building 40 GWh of energy storage by 2030, with installed capacity expected to grow at ~20% CAGR till 2030. Total locked-in capacity already stands at 30,462 MW, including 12,540 MW under construction (all tied up under long-term PPAs), 150 MW under acquisition and a 4,561 MW pipeline. Growth initiatives underway include the 1,600 MW Salboni thermal project, ~3.4 GW of solar and ~2.3 GW of wind under construction, the 3,800 TPA green hydrogen plant at Vijayanagar where green hydrogen and oxygen supply is expected to commence soon, and the 5 GWh battery assembly plant at Pune where line setup and commissioning is expected in Q3 FY26. The Mahanadi water security acquisition and the proposed GE Power India boiler business acquisition secure critical resources and equipment supply for thermal growth. On sustainability, the company is committed to carbon neutrality by 2050, reducing carbon emissions by more than ~50% and raising renewables to two-thirds of total installed capacity by 2030, with FY30 targets for GHG intensity (0.39 tCO₂e/MWh), freshwater intake (0.68 m³/MWh) and air emissions. On the business environment, Indian real GDP growth is estimated at 6.8% for FY26 per RBI, while GST rationalisation is expected to boost consumption and reduce capital costs in the power sector, optimizing power affordability.
